## First 5 Things to Read Today!

Take a look at some of the recent articles about important issues related to children and families:

**1. CNN: Opinion: If women are encouraged to breastfeed for two years, they need much more support**

**2. Opinion: COVID-19 vaccination is approved for babies. As a pediatrician, here's why I recommend it.**

COVID-19 has caused more than 2 million infections among children ages 6 months to 4 years old and is associated with 20,000 hospitalizations.

**3. EdSource: More teachers, outreach needed to support California's youngest English learners**

California's effort to provide all 4-year-olds in the state with one year of transitional kindergarten, or TK, by 2025 is historic and one of the largest investments state policymakers are making in our youngest learners that will pay dividends for decades to come.

**4. The Hill: Our children are in crisis; thus, our village is in crisis**

As a society, we often refer to the proverb, it takes a

village to raise a child. The village — families, friends, schools, clinical professionals, communities and elected officials — has never been more important as our children experience the pain and impacts caused by struggles with their mental health.

**5. CNN: Set bedtime back to prepare your child for kindergarten, study says**

A backpack, lunch box, crayons and at least 10 hours of sleep each night are all things children need to get off to a good start in kindergarten, according to a new study.
